November 20, 2020

Dear Parents/Guardians,

As anticipated and discussed at this week's Harmony Township Board of Education meeting, and in the letter that was shared Wednesday, the Northwest Region of our state has reached the High Risk or Orange level indicator for positivity regarding COVID-19. Therefore, in consultation with the Warren County Health Department and the Executive County Superintendent, the Harmony Township School District and Belvidere High School Cluster will be working remotely effective Monday, November 23rd through Wednesday, November 25th.

The administrative team will be working with our Pandemic Response team to put in place protocols that will allow us to open and operate safely in the Orange Phase. We are hopeful that with protocols in place, that we can return to in-person learning the week of 11/30. I will update everyone on this next week. If we, as a region, move into the Very High-Risk Level or Red Phase, then we will have to pivot to all remote learning until we exit that phase.

At this time, my office remains hopeful that the Northwest Region will not exceed this current COVID-19 level. I appreciate everyone's understanding and flexibility as we navigate through the Pandemic together. I would also like to ask that everyone adhere to the New Jersey Department of Health guidelines for travel and family gatherings during the Holidays.

I wish all of your families continued good health, safety, and a peaceful Thanksgiving Holiday!

Sincerely,

Christopher Carrubba  
Chief School Administrator
